```
Roll No. 161210025
Words = 7
Size of file = 38
```

```
                testscript.py          ●          details.txt
  1   hello this is a line
  2   and a new line
  3   and another new line
  4   just for testing
  5   that words on new line are also counted.
  6   Now this is enough for testing.
  7   if this works fine
  8   then my code should be correct
  9   i guess!
```
